FOREWORD

Australian Fisheries Statistics is designed to meet the needs of the fishing industry and fisheries managers, policy makers and researchers. ABARE has been publishing detailed production and trade data in this series since 1991. The estimates of the gross value of production provided in the report are used for a range of purposes — for example, to determine Commonwealth, state and territory fisheries research funding arrangements each year.

This report contains data on the volume and value of production from state and Commonwealth fisheries, and on the volume and value of Australian fisheries trade, by destination, source and product, for the three years to 2002-03. The report also contains a profile of Commonwealth and state fisheries and state aquaculture for 2002-03, covering selected species, fishing method and number of licence holders.

Australian Fisheries Statistics is part of a suite of ABARE publications that provide a comprehensive account of historical trends in, and the outlook for, Australian fisheries. *Australian Commodity Statistics* provides a historical series of production and trade statistics for fisheries and a range of other commodities. *Australian Commodities* includes forecasts for major fisheries commodities that are updated each quarter. Detailed analysis of the economic performance of selected fisheries is provided in the annual *Australian Fisheries Surveys Report*.

BRIAN S. FISHER
Executive Director

February 2004

ACKNOWLEDGMENTS

Dana Langenkamp, David Galeano, Graham Love, Alistair Peat, Dianne Stefanac and Hong Shan prepared this report. Assistance from Patrick Hone from the Fisheries Research and Development Corporation is also appreciated. The assistance of officers of state fisheries departments and the Australian Fisheries Management Authority, researchers and various industry representatives is gratefully acknowledged. The Australian Bureau of Statistics supplied the trade data.

The Fisheries Research and Development Corporation and the Australian Government Department of Agriculture, Fisheries and Forestry provided funding for this research.

Inquiries about Commonwealth and state catch information should be directed to the respective coordinators of fisheries statistics shown below.

DEFINITIONS AND EXPLANATIONS

Definitions

Aquaculture production is the liveweight quantity of product produced and marketed by aquaculturists.

Aquaculture value is the assessed value received by agriculturists on the basis of an at 'farm gate' equivalent, for product marketed.

Export quantity data are supplied by the Australian Bureau of Statistics on the basis of the net product weight exported.

Export value data are supplied by the Australian Bureau of Statistics on the basis of free on board value.

Import quantity data are supplied by the Australian Bureau of Statistics on the basis of the net product weight imported.

Import value data are supplied by the Australian Bureau of Statistics on the basis of product cost plus insurance and freight.

Production quantity is a measure of the quantity of fish product landed by fishery, usually on the basis of catch records.

Production value is the assessed value at the point of landing for the quantity produced and excludes transport and marketing costs.

Products consist of fisheries products marketed for human consumption plus nonedible fisheries products.

Seafood is any fish or other aquatic plant or animal intended for human consumption; it excludes nonedible fisheries products.

Southern bluefin tuna

Southern bluefin tuna sold from farms in South Australia are reported at their full market value. However, the input value of those tuna is also included as an output from the Commonwealth southern bluefin tuna fishery. To avoid double counting, the input value is netted out of Australian totals.

Rounding

Small discrepancies in totals are generally caused by the rounding components. A dash (–) is used to denote a nil or negligible amount.

PRODUCTION AND TRADE

key features

Dana Langenkamp

Gross value and production

tables 1–16

Overview

Quantity and value

Australian fisheries production rose by 4.9 per cent in 2002-03 to 249 000 tonnes. However, with falling unit values for many species, the gross value of fisheries production fell by 5.5 per cent to \$2.3 billion. The gross value of products from state and Commonwealth wild catch fisheries fell, while the gross value of aquaculture production increased. The total value of state wild catch fisheries production fell by 5.8 per cent, or \$74.6 million, to \$1.2 billion, while that for the Commonwealth wild catch fisheries fell by 13 per cent or \$63.7 million to \$417 million. Aquaculture gross domestic value of

production increased by 1.5 per cent to almost \$743 million in 2002-03.

Australian dollar

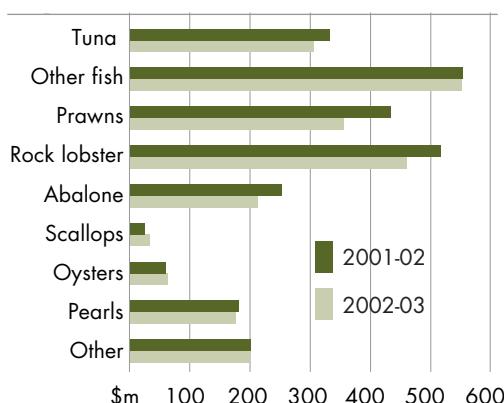

In 2002-03 the Australian dollar appreciated by 11 per cent relative to the US dollar, and 6 per cent relative to the Japanese yen, compared with its level in 2001-02. Australia is a small producer of fish, and the export prices received by Australian producers are set in world markets. Other things being equal, an appreciating Australian dollar results in lower export prices in Australian dollar terms. This explains a large part of the fall in the unit value of many of the fisheries products in 2002-03.

Gross value, by major species group and locality

Finfish, crustaceans and molluscs make up the majority of Australian fisheries production (figure A). The gross value of finfish production (both wild caught and aquaculture) in 2002-03 fell by \$12.3 million or 1.4 per cent to \$857 million, mainly owing to the decline in the value of Commonwealth wild caught production. The gross value of crustacean production fell by 12 per cent or \$123 million. Wild caught harvests of all crustacean species fell. The gross value of mollusc production also fell, from \$540 million to \$523 million (down 3.1 per cent) in 2002-03. The increased value of harvest of other mollusc species failed to offset the fall in value of abalone (tables 2-4).

By location of catch, over 50 per cent of the gross value of Australia's fisheries production in 2002-03 was accounted for by the south eastern states — New South Wales, Victoria, South

A Value of Australian fisheries products

Australia and Tasmania (figure B). Western Australia accounted for a further 28 per cent, while Queensland and the Northern Territory made up the remaining 19 per cent. Commonwealth, state and territory production is allocated according to the state or territory waters in which the catch is taken. The total includes aquaculture production but excludes hatchery production (see footnote a, table 5).

Aquaculture's share

Since 1992-93, the real value of aquaculture production has more than doubled from \$331 million (in 2002-03 dollars) to \$743 million in 2002-03. This represents an annual rate of growth of 11 per cent in nominal terms and 8 per cent in real terms. Australia's wild catch fisheries gross value of production grew at a lesser rate than this. As a result, aquaculture's share of Australia's total fisheries gross value of production increased from 17 per cent in 1992-93 to 32 per cent in 2002-03.

State and territory fisheries

New South Wales

The gross value of fisheries production in New South Wales increased by \$0.4 million in 2002-03 to a total of \$139 million (table 6). The total value of wild caught fish decreased by \$1.7 million, while the value of crustaceans and molluscs fell by \$1.4 million and \$2.9 million

respectively. The value of wild caught fish production in 2002-03 fell by 4.8 per cent to \$34.8 million, mainly due to a fall in the harvest of sea mullet and jack mackerel. The 16 per cent fall in mollusc production to \$15.4 million in 2002-03 was mainly accounted for by the drop in the value of abalone harvest of \$1.9 million. The decline in the gross value of king prawns by \$3.3 million led to the fall in value of the crustacean harvest by 3.5 per cent to \$37.4 million in 2002-03.

In contrast to the wild caught fishery, the gross value of New South Wales aquaculture production increased by 16 per cent, from \$43.7 million in 2001-02 to \$50.6 million in 2002-03. The \$6.9 million increase was driven mainly by an increase in the value of production of oysters (up \$3.0 million to \$34.6 million) and prawns (up \$0.7 million to \$6.2 million in 2002-03). Trout was the main aquaculture species that fell in value, down by \$0.6 million to \$1.4 million in 2002-03.

Victoria

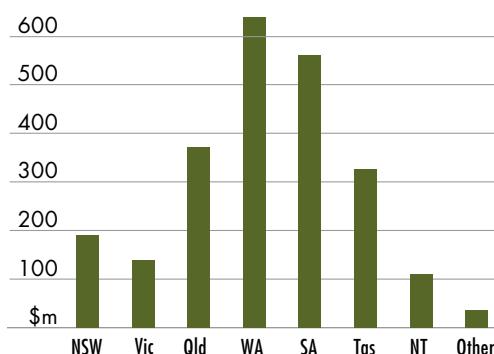

The gross value of Victorian fisheries production fell by \$12.4 million or by 10 per cent to \$109 million in 2002-03 (table 7). Wild caught production, which constitutes the majority of Victorian production, fell by 13 per cent to \$87.2 million. Most of the \$13.3 million decrease was driven by the \$9.0 million fall in the value of abalone production to \$53.5 million in 2002-03. Rock lobster production also fell, by \$4.1 million to \$17.4 million in 2002-03.

The gross value of Victorian aquaculture production rose by \$0.9 million or 4.4 per cent in 2002-03 to \$21.7 million. Major contributors to this rise were mussels and trout, with higher production and prices. The rise in the gross value of aquaculture production occurred in spite of falls in the gross value of yabby and eel production.

Queensland

The gross value of fisheries production in Queensland fell slightly in 2002-03, from \$291 million to \$285 million (table 8). The gross value of wild caught crustaceans production increased by \$13.2 million in 2002-03 to

**B Value of Australian fisheries products
2002-03**

\$123 million. This increase was largely driven by a \$10.6 million increase in prawn production. Mollusc production fell by 46 per cent to \$8.5 million in 2002-03. The majority of this decrease was caused by a halving in the value of scallop production to \$7.5 million. Wild finfish production also fell by 3.3 per cent to \$89.1 million in 2002-03. Lower harvests of many of the finfish species led to the fall in total value, despite increases in the value of mackerels (up \$1.8 million), mullet (up \$280 000) and red throat emperor (up \$47 000).

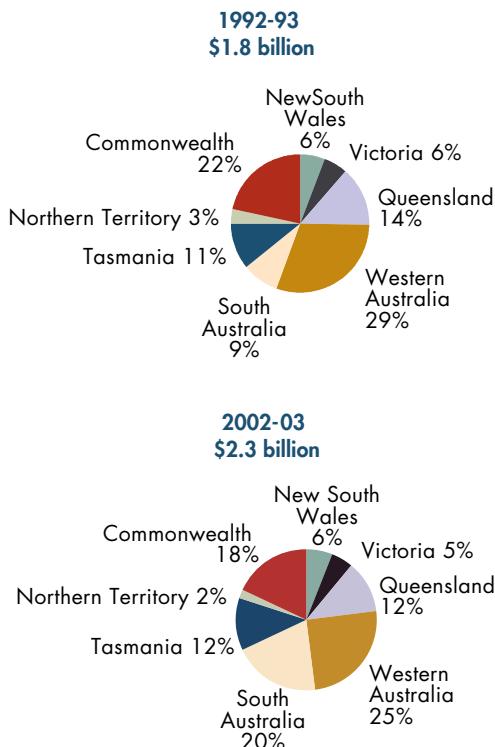

The estimated gross value of Queensland aquaculture production fell by 11 per cent to \$63 million in 2002-03. The majority of the value (80 per cent) of Queensland aquaculture production is derived from farmed prawns. In 2002-03 the value of prawn production fell by 15 per cent from \$60 million in 2001-02 to \$50.7 million in 2002-03. Aquaculture production of barramundi increased by 27 per cent or \$1.8 million to \$8.5 million in 2002-03, driven mainly by a 37 per cent increase in production volume. Oyster production also rose by \$160 000 to \$680 000 in 2002-03.

Western Australia

The gross value of fisheries production in Western Australia in 2002-03 fell by \$9.1 million from \$616 million in 2001-02 to \$607 million in 2002-03 (table 9). While the values for wild caught molluscs rose, the value of wild caught fish and crustaceans and aquaculture fell. Mollusc production increased by \$14.8 million to \$49.6 million in 2002-03. The 42 per cent rise stemmed from an increase in the value of production of scallops and squid, and despite a fall in the value of abalone. Scallop production increased by \$16.3 million (to \$22.8 million in 2002-03) and squid production increased to \$0.5 million. Abalone production fell by 12 per cent to \$12.9 million in 2002-03. Wild fish production increased by \$2.0 million to \$41.9 million, driven by increases in the value of tropical snapper (up \$0.8 million to \$8.5 million), shark and sharkfin (up \$0.3 million to \$6.1 million) and pilchards (up \$0.4 million to \$1.9 million).

The wild caught crustacean harvest fell by \$25.4 million to \$334 million in 2002-03,

C Shares of value of fishery production

mainly from the decrease in the value of rock lobster and prawn harvests by \$24.2 million and \$1.3 million respectively. The fall in the value of the rock lobster harvest caused by a 27 per cent drop in average prices, offsetting the increase in catch.

Aquaculture production fell slightly from \$181.8 million in 2001-02 to \$181.3 million in 2002-03. The decrease in value was caused mainly by the fall in mussel and yabby production that more than offset the increase in finfish production. The value of mussel production in 2002-03 fell by 43 per cent to \$1.6 million, while yabby production fell by 19 per cent to \$1.0 million. Aquaculture production of finfish species more than doubled to \$1.8 million.

South Australia

The gross value of fisheries production in South Australia fell by 3.3 per cent to \$474 million in 2002-03 (table 10). The \$15.9 million fall

was driven mainly by a fall in the value of wild caught crustaceans and aquaculture. The value of wild caught crustacean production fell by \$24 million to \$120 million in 2002-03. This fall in value was driven by lower harvests of prawns (down by \$15 million to \$32.4 million) and rock lobster (down by \$9.2 million to \$82.7 million). Increased production value of wild abalone and squid by \$1.4 million and \$1.1 million respectively, increased the value of wild caught mollusc production by 7.8 per cent to \$41.6 million in 2002-03. Production of wild caught fish increased from \$24.5 million in 2001-02 to \$33.8 million. The increase was driven largely by a \$9.3 million increase in the value of pilchard harvest to \$17.8 million in 2002-03.

The majority of South Australian aquaculture value is derived from the farming of southern bluefin tuna, which provided \$256 million of the \$279 million total value in 2002-03. The value of production of farmed southern bluefin tuna fell by 2 per cent in 2002-03. Abalone production fell to \$0.9 million in 2002-03 from \$1.9 million in 2001-02, largely because of a fall in prices and a reduced harvest.

Tasmania

The gross value of Tasmanian fisheries production in 2002-03 fell by 12 per cent or \$39.5 million to \$288 million (table 11). Both wild caught harvest and aquaculture production fell, by \$38.2 million and \$1.3 million respectively. The wild caught harvest in Tasmania is dominated by abalone, the total value of which was \$97.9 million in 2002-03. The value of wild caught crustaceans dropped by \$14.6 million to \$53.3 million, driven mainly by lower average prices for rock lobster and reduced harvests of giant crabs. The value of the mollusc harvest fell by \$21.8 million to \$99.9 million. Falls in abalone harvest and prices were responsible for the decline. The value of the wild caught fish harvest fell by \$0.5 million to \$4.3 million, driven mainly by a \$0.7 million fall in the value of the Australian salmon harvest in 2002-03.

The decrease in value of aquaculture production was driven mainly by the \$3 million fall in the value of salmonid production, to \$108 million in 2002-03.

Northern Territory

The gross value of fisheries production in the Northern Territory in 2002-03 increased by \$19.0 million to \$54.9 million (table 12). Wild caught production of molluscs and fish increased by \$1.8 million and \$5.6 million respectively. Increases in production of mackerel, shark and sea perch were mainly responsible for the increase in wild caught fish production. The value of mackerel production increased by \$4.9 million to \$5.0 million in 2002-03. Production of shark increased by \$3.9 million to \$6.2 million. The increase in the gross value of wild fish production was despite the fall in value of jewfish and cod harvests of \$1.2 million and \$0.4 million respectively.

Wild caught crustacean production fell by over half to \$5.2 million. This was largely caused by a drop in crab production from \$10.3 million in 2001-02 to \$5.0 million in 2002-03. Aquaculture production rose by \$17.3 million to \$21.9 million in 2002-03.

Commonwealth fisheries

Main fisheries

The main Commonwealth fisheries include the northern prawn fishery (which had a gross value of production of \$82.5 million in 2002-03), the southern bluefin tuna fishery (\$77.8 million), the eastern tuna and billfish fisheries (\$67.9 million), the south east trawl fishery (\$65.7 million), the Torres Strait fisheries (\$35.1 million) and the western and southern tuna fishery (\$20.0 million) (table 13).

Quantity and value of production

The value of production in the northern prawn fishery fell by \$52 million from the almost \$135 million achieved in 2001-02, mainly because of a fall in harvest and the unit values of the two major species, banana and tiger prawns. Harvests of both of these species have generally trended downwards since 1994-95 (the 2000-01 and 2001-02 banana prawn harvests being unusually high). Domestic prawn prices fell in 2002-03 partly owing to an increase of frozen stocks resulting from the sharp fall in exports to

the main Asian markets during the outbreak of Severe Acute Respiratory Syndrome (SARS).

In the Torres Strait fishery, harvests fell slightly but the gross value of production increased from \$34.2 million in 2001-02 to \$35.1 million in 2002-03. This rise stemmed mainly from the 62 per cent increase in the gross value of tropical rock lobster production. Altered management arrangements in the Spanish mackerel fishery in 2002-03 led to the separation of finfish species (excluding Spanish mackerel) into a Torres Strait reef line fishery.

The gross value of production for the south east trawl fishery fell by \$4.3 million to \$65.7 million in 2002-03 despite an 8 per cent increase in the harvest. Most of this fall can be attributed to the fall in harvest value of blue grenadier and tiger flathead, which fell by \$3.9 million and by \$3.7 million respectively.

In 2002-03 the south east nontrawl and southern shark fisheries were combined into the gillnet, hook and trap fishery for the purposes of management. The gross value of production in this new fishery rose in 2002-03 from the combined gross value of production of the south east nontrawl and southern shark fisheries in 2001-02. The value of production rose by 3.2 per cent to \$21.6 million.

The gross value of production for the eastern tuna and billfish fisheries fell by \$11.0 million to \$67.9 million in 2002-03. This was driven mainly by a fall in the level and value of harvest for bigeye tuna and billfish species. In 2002-03 there was no recorded catch by purse seine or pole methods.

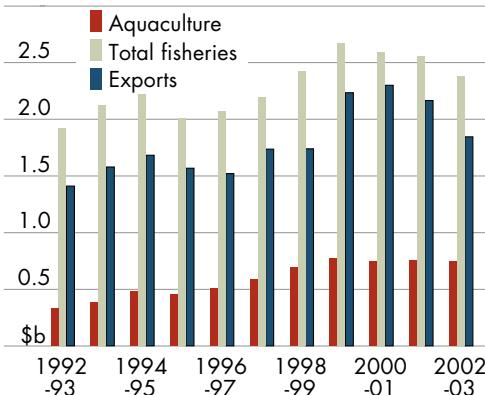

The gross value of production for the western and southern tuna fishery fell by \$13.7 million in 2002-03 to \$20.0 million. This fall reflected the fall in the level and value of harvest of the majority of the tuna fish species and billfish.

Production in the southern bluefin tuna fishery remained relatively constant at its quota level of a little over 5200 tonnes, while the gross value of production increased by \$5.4 million to \$77.8 million.

Aquaculture

The gross value of aquaculture production in Australia increased to \$743 million in 2002-03,

D Real value of Australian fisheries production and exports

up by 1.5 per cent from \$732 million in 2001-02. Aquaculture represented 32 per cent of Australia's total fisheries gross value of production in 2002-03 (figure D).

South Australian aquaculture production accounted for 37 per cent of the total value in 2002-03, the bulk of the value of production in South Australia from farmed southern bluefin tuna.

Western Australia accounted for 24 per cent of the total value of Australian aquaculture production. The value of Western Australian aquaculture was dominated by pearls, which contributed 97 per cent of the total value of production.

Tasmanian aquaculture production in 2002-03 represented 17 per cent of the total value of Australian aquaculture production. Farmed Atlantic salmon accounted for the majority of this.

Prawn farming continues to dominate Queensland aquaculture production, with Queensland contributing 8 per cent of the gross value of Australian aquaculture production in 2002-03.

New South Wales is the largest producer of edible oysters. Oyster production made up 68 per cent of the state's aquaculture production for 2002-03. New South Wales accounted for 7 per cent of the gross value of Australian aquaculture production.

The bulk of Victoria's 3 per cent contribution to the total gross value of aquaculture production was derived from farmed trout. Trout made

up over half of the Victoria's aquaculture value in 2002-03.

The Northern Territory contributed 3 per cent of the Australian gross value of aquaculture production in 2002-03. Detailed figures can not be published due to the small number of producers.

Exports of fisheries products

tables 17-27

Value of exports

Export value, by sector

Australia's total exports of fisheries products in 2002-03 were valued at \$1.84 billion. Over 80 per cent of total exports is comprised of edible fisheries products, such as rock lobster, tuna, abalone and prawns. The remaining 20 per cent of exports were nonedible fisheries products such as pearls, fish meal and marine fats and oils. Pearls are the dominant nonedible export, by value.

The value of total fisheries exports fell by 12 per cent from 2001-02 to 2002-03. Exports of edible products fell by 11 per cent to \$1.48 billion, while exports of nonedible products fell by 18 per cent to \$360 million. The drop in edible export value was mainly caused by a 14 per cent fall in the value of crustacean and mollusc exports that stemmed from a lower quantity exported as well as falls in the unit prices of abalone and rock lobster. The outbreak of SARS (Severe Acute Respiratory Syndrome) in Asia and the consequent fall in exports of live product to Asian markets resulted in more abalone and rock lobster being processed to lower value canned and tailed products. The decline in nonedible export value to \$360 million in 2002-03 was again principally caused by a fall in the value of pearl exports — down 18 per cent to \$332 million.

Edible fisheries exports

The principal edible fisheries exports in 2002-03 were rock lobster (\$463 million), tuna (\$321 million), abalone (\$216 million) and prawns

(\$208 million). Finfish export value continues to be dominated by tuna, which constitutes two-thirds of total finfish export value. Impacts of the SARS outbreak included reduced exports of live, fresh or chilled products in 2002-03. To compensate, exports of frozen and prepared products rose substantially, especially of abalone and rock lobster.

Nonedible fisheries products exports

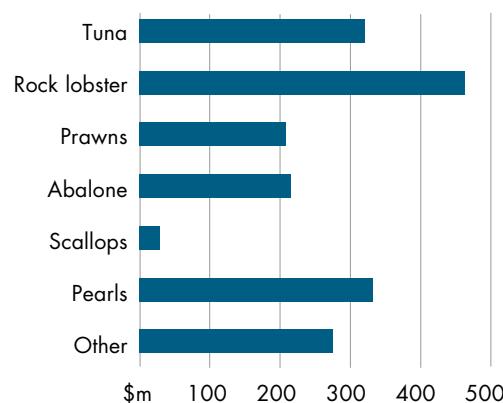

Nonedible exports are dominated in value by pearl exports, which at \$332 million made up 92 per cent of total nonedible exports in 2002-03. Exports of fish meal, marine fats and oils and ornamental fish made up a further 6.5 per cent of the total value of nonedible fisheries products exports.

Trends in export value

Over the period 1992-93 to 2002-03 the real value of total fisheries products (edible and nonedible products) rose by 31 per cent. In 2002-03 dollars, the export value of total fisheries products increased from \$1.4 billion in 1992-93 to \$1.84 billion in 2002-03.

Tuna exports accounted for a significant proportion of this growth, with the total value of tuna exports rising from \$8.4 million in 1992-93 (in 2002-03 dollars) to \$321 million in 2002-03 (figure E).

E Value of Australian fisheries exports, 2002-03

Exports, by destination

Main markets for seafood

Japan continues to be Australia's main export market for edible fisheries products (table 23). In 2002-03 42 per cent of edible fisheries products, valued at \$628 million, went to this market (table 24). Hong Kong and the United States were the next largest destinations, taking edible fisheries products exports valued at \$356 million and \$152 million respectively in 2002-03.

The majority of Japan's imports of edible fish from Australia comprised tuna products valued at \$311 million in 2002-03. Exports to Hong Kong were mainly rock lobster valued at \$145 million. Over 68 per cent of seafood exports to the United States were also rock lobster (\$105 million of the \$152 million total).

Hong Kong and Japan were the two primary destinations for Australian exports of crustacean and mollusc products in 2002-03, taking \$337 million and \$291 million of crustacean and mollusc exports respectively. Together, this represented 63 per cent of Australia's edible shellfish exports. The United States and Chinese Taipei together took a further 20 per cent, valued at \$200 million.

Almost half of the exports to Japan were tuna products (\$311 million). Another 18 per cent were prawns and 17 per cent were rock lobster. Shellfish exports to Hong Kong comprised mainly rock lobster (41 per cent, valued at \$145 million) and abalone (28 per cent, valued at \$101 million).

Change in value of seafood exports

The total value of exports to Japan, Hong Kong and Chinese Taipei fell in 2002-03. For the most part this fall was a result of falls in the quantity of overall exports to these countries as well as a fall in unit prices of a majority of products.

Exports to the United States rose in 2002-03. This rise was mostly attributable to the increase in exports of rock lobster tails, which increased by almost 645 tonnes or \$40 million. With the SARS outbreak in Asia, Australia exporters were unable to sell the usual quantities of whole rock lobster to Asia. Instead rock lobster tails were

exported to the US market where they were easily absorbed.

Main markets for nonedible fisheries products

The principal markets for nonedible fisheries products in 2002-03 were Hong Kong (\$77.6 million), the United States (\$46.5 million), Japan (\$28.2 million) and New Zealand (\$19.3 million). Other markets for nonedible products included France, the United Kingdom and Germany.

Exports, by state

Principal exporters

South Australia and Queensland are the main exporters of finfish, while South Australia and Western Australia are the main exporters of crustaceans (tables 25-27). Of total edible fisheries products, South Australia provided 30 per cent, Western Australia 28 per cent and Queensland 19 per cent in 2002-03.

Imports of fisheries products

tables 28-37

Value of imports

Import value, by sector

Australia imported \$1.20 billion of fisheries products in 2002-03, \$1.8 million more than in 2001-02. Almost 80 per cent (\$950 million) of the gross value of imports was edible fisheries products, consisting of finfish, crustaceans and molluscs and in particular frozen finfish fillets, canned fish and prawns. The value of imports of edible fisheries products increased by 7 per cent in 2002-03. The remaining \$252 million consisted of nonedible fisheries products which included pearls, fish meal, ornamental fish and marine fats and oils.

Imports of edible fisheries products

In 2002-03, finfish imports made up 50 per cent (\$591 million) of the total value of fish-

eries products imports, while crustaceans and molluscs made up 28 per cent (\$360 million). The largest categories of edible finfish imports in value terms were canned fish (\$208 million, 35 per cent of edible finfish imports) and frozen fillets (\$204 million, 34 per cent). Crustaceans and mollusc imports consisted mainly of prawns, valued at \$220 million (66 per cent of crustacean and mollusc imports) followed by calamari, squid and octopus and scallop imports, valued at \$46 million and \$24 million respectively in 2002-03.

Australian imports relatively large volumes of low value fish and crustaceans (figure F), and exports relatively small volumes of high value fish and crustaceans. In product weight terms, fish imports in 2002-03 were three times that of exports, but the average unit value of exported fish was three times the value of imported fish.

Nonedible fisheries products imports

Nonedible fisheries products imported in 2002-03 consisted of pearls, fish meal, marine fats and oils, and ornamental fish. The bulk of this was accounted for by pearls (\$163 million), followed by fish meal and marine fats and oils (\$27 million and \$14 million respectively).

Trends in quantity imported

Over the period 1992-93 to 2002-03, the quantity of seafood imports into Australia increased by 59 per cent. Finfish imports increased by 62 per cent and shellfish imports by 66 per cent. In 2002-03 the quantity of imports of edible fisheries products into Australia increased by 13 per cent from the previous year. The increase in imports of finfish (15 per cent), and in particular canned, and frozen whole finfish products, was responsible for the bulk of the increase in the quantity of imports of edible products. Imports of crustaceans and molluscs increased in volume by 6 per cent in 2002-03.

Imports, by source

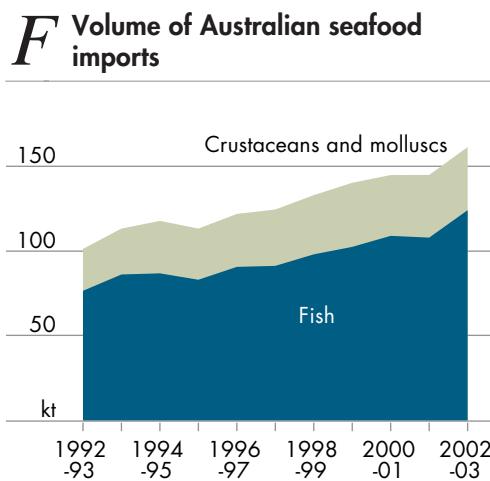

Seafood

In 2002-03 around 44 per cent of edible imports by value originated from just two countries, Thailand and New Zealand (table 36). Imports from Thailand made up 26 per cent of edible imports by value (\$237 million), followed by 19 per cent from New Zealand (\$171 million). The remainder of edible imports originated from a number of countries including Viet Nam (\$75.7 million), India (\$42.1 million), China (\$39.5 million), and South Africa (\$37.9 million).

Over half of Australia's imports of canned fish and 35 per cent of crustacean imports in 2002-03 were sourced from Thailand. New Zealand was the source of almost 40 per cent of Australian imports of fresh, chilled or frozen fish products (valued at \$111 million) and over 20 per cent of mollusc imports (\$24.5 million). Almost 40 per cent of dried, salted and smoked fish products were imported from Denmark (\$9.7 million).

Nonedible fisheries products

Almost 30 per cent of Australian imports of nonedible fisheries products in 2002-03 by value were from Indonesia (\$18.9 million), Peru (\$18.8 million), United States (\$17.6 million) and New Zealand (\$16.9 million).

AUSTRALIAN FISHERIES

2003 profile

Commonwealth

Fishery	Area	Species	Main fishing method	Number
Northern prawn	Gulf of Carpentaria from Cape York to Cape Londonderry	Banana, tiger, endeavour and king prawn	Otter trawling	94 vessels
Torres Strait	Torres Strait waters	Prawn, rock lobster, Spanish mackerel, pearl shell, trochus shell, and reef fish	Otter trawl, troll and dive	456 rock lobster 302 mackerel 153 pearl shell 79 prawn 151 sea cucumber 119 trochus 81 crab 329 line 98 net
South east trawl	Commonwealth waters from Barrenjoey Point NSW, around Tasmania to Cape Jervis SA	Mixed fish species particularly orange roughy, ling, blue grenadier, flathead, and warehou	Otter trawl and Danish seine	118 concessions
Gillnet, hook and trap fishery	Commonwealth waters off south Queensland, NSW, Victoria, Tasmania and SA	Mixed fish species particularly pink ling, blueeye trevalla, gummy shark	Demersal gillnet, demersal longline, dropline, trotline, trap and purse seine	425 concessions
Great Australian Bight	Commonwealth waters Between Cape Leeuwin WA and Kangaroo Island, SA	Deepwater flathead, orange roughy and Bight redfish	Demersal otter, and limited midwater trawl	10 concessions
Southern bluefin tuna	Commonwealth waters especially the southern and south eastern parts the AFZ	Southern bluefin tuna	Purse seining, pole and line, longline and trolling	42 concessions
Eastern tuna and billfish	Commonwealth waters off Queensland NSW, Victoria and Tasmania from Cape York to the SA/Victoria border	Yellowfin, bigeye, skipjack, and albacore tuna, and billfish species	Pelagic longline, purse seine, pole, trolling, rod and reel, and handline	305 concessions

Fishery	Area	Species	Main fishing method	Number
Southern and western tuna and billfish	Commonwealth waters from Cape York around northern Australia to the SA/Victorian border	Yellowfin, bigeye, skipjack, and albacore tuna, and some billfish species	Pole and line, purse seine, pelagic longline, troll, rod and reel and handline	7 western area only, 45 southern area and 72 both areas
Bass Strait scallop	Commonwealth waters off SA, Victoria and Tasmania	Scallop	Dredge	154 concessions
Jack mackerel	Commonwealth waters Purse seine, midwater from north of the NSW/Queensland border along southern Australia to near Perth WA	Greenback, yellowtail and Peruvian jack mackerel	Purse seine and midwater trawl	71 concessions
Southern squid	Commonwealth waters Off SA, Victoria, NSW Tasmania and southern Queensland	Arrow or Gould's squid	Jig	84 concessions
Sub Antarctic	Heard, McDonald Islands and Macquarie Island waters	Patagonian toothfish, and icefish	Otter trawl and midwater trawl	4 concessions
Western Deepwater trawl North West slope	Commonwealth waters off WA Commonwealth waters off the northern parts of WA	Mixed fish species Scampi	Otter trawl Otter trawl	11 concessions 7 concessions
Coral Sea	Commonwealth waters, From Sandy Cape to Cape York	Reef fish, trochus, lobster, aquarium, fish, sea cucumber	Otter trawl, handlines, diving, seine nets	20 concessions
South Tasman Rise	High seas adjacent to AFZ, south of Tasmania	orange roughy, oreo dory	Deepwater demersal trawling	14 concessions

State fisheries

New South Wales

Fishery	Species	Main fishing method	Number
Abalone	Blacklip abalone	Diving	47 licence holders
Rock lobster	Eastern rock lobster	Traps	160 licence holders
Ocean prawn trawl	Eastern king, school whiting and octopus	Trawling	311 licence holders
Ocean trap and line	Spanner crabs, snapper and bonito	Fish traps, dropline longline, spanner crab nets	519 licence holders

Fishery	Species	Main fishing method	Number
Ocean haul	Sea mullet, blue Mackerel and yellowtail	Purse seine and haul nets	319 licence holders
Ocean fish trawl	Tiger and sand flathead, silver trevally, and fiddler ray	Trawling	99 fishing licences
Estuary prawn trawl	School prawns squid	Trawling	216 licence holders
Estuary general Prawns, and pippis	Sea mullet, luderick hand gathering	Mesh and haul, nets,	698 licence holders
Aquaculture	Prawns Yabbies Oysters Silver perch Trout Snapper Main fishing	Pond culturing Ponds and farm dams Rack tray and stick Pond Ponds and raceway Ponds Number	14 licence holders 143 licence holders 402 licence holders 139 licence holders 28 licence holders 13 licence holders

Victoria

Abalone	Greenlip, blacklip	Diving	71 licence holders

Bay and inlet	Mixed fish species	Various	113 licence holders
Rock lobster	Southern rock lobster	Pots	138 licence holders 7183 pots
Giant crab	Giant crab	Pots	42 licence holders 2858 pots
Inshore trawl	Mixed fish species	Trawling	61 licence holders
Ocean (general)	Mixed fish species	Various	418 licence holders
Aquaculture	Mussels Yabbies Trout Warmwater finfish	Longlines Ponds and farm dams Raceways Recirculation units	28 licence holders 60 licence holders 35 licence holders 61 licence holders

Queensland

East coast trawl	Tiger, banana, red spot king, endeavour, eastern king, 'bay' prawns, scallops, 'bugs' and trawl whiting	Otter trawl	492 licence holders
River and estuary trawl	Banana, 'bay' and tiger prawns	Beam	163 licence holders
Gulf of Carpentaria Inshore	Barramundi, king and blue threadfin, tropical shark, Grey mackerel	Set (gill) net	90 licence holders

Fishery	Species	Main fishing method	Number
East coast net inshore (mainly tropical)	Barramundi, king and blue threadfin, tropical shark, grey mackerel	Set (gill) net	228 licence holders
East coast net inshore (mainly subtropical)	Barramundi, king and blue threadfin, tropical shark, grey mackerel, mullet, tailor, bream, whiting	Seine and some net	560 licence holders
Line	Coral trout, Spanish mackerel, red throat emperor	Handline, trolling	235 permitted to use up to four dories, 1334 may use only one dory
Crab – estuary	Mud and blue swimmer	Pot	884 licence holders
Crab – oceanic	Spanner crabs		245 licence holders
Aquaculture	Prawns Barramundi Oysters Redclaw Silver perch Eels Barcoo grunter Main fishing	Pond culture Pond and cage culture Rack and stick culture Ponds Ponds and tanks Ponds and tanks Ponds and tanks	58 licence holders 140 licence holders 124 licence holders 233 licence holders 129 licence holders 19 licence holders 56 licence holders

Western Australia

West coast rock lobster	Western rock lobster	Pots	563 boats and 56 902 pots
Abalone	Greenlip, brownlip and Roe's abalone	Diving	29 licence holders
Shark Bay prawn	King, tiger and endeavour prawns, scallops	Trawling	27 licence holders
Exmouth prawn	King, tiger and endeavour prawns	Trawling	13 licence holders
Nickol Bay prawn	King and banana prawns	Trawling	13 licence holders
Shark Bay scallops	Scallops	Trawling	41 licence holders
Aquaculture	Pearls Yabbies Marron Mussels	Longlines Ponds and farm dams Ponds and farm dams Longlines	

South Australia

Southern zone rock lobster	Southern rock lobster	Pots	181 licence holders
Northern zone rock lobster	Southern rock lobster	Pots	69 licence holders

Fishery	Species	Main fishing method	Number
Western zone Abalone	Greenlip, blacklip abalone	Diving	23 licence holders
Southern zone Abalone	greenlip, blacklip abalone	Diving	6 licence holders
Central zone Abalone	greenlip, blacklip abalone	Diving	6 licence holders
Blue crab	Blue crab	Pots	8 licence holders
West coast prawn	Western king prawn	Trawling	3 licence holders
Spencer Gulf prawn	Western king prawn	Trawling	39 licence holders
Gulf St Vincent prawn	Western king prawn	Trawling	10 licence holders
Marine scalefish	Various finfish, Crustaceans, molluscs	Netting, line fishing, handlines and traps	382 licence holders
Restricted marine Scalefish	Various finfish, crustaceans, molluscs	Netting, line fishing, handlines and traps	32 licence holders
Miscellaneous	Various finfish, Crustaceans, molluscs, worms	Traps, diving, etc	19 licence holders
Pilchard (also incl in marine scalefish)	Pilchard	Purse seine	14 licence holders
Lakes and Coorong	Freshwater finfish, marine Finfish, molluscs	Netting, line fishing, handlines	37 licence holders
River Fishery	Freshwater finfish, crustaceans	Netting, pots	6 licence holders
Aquaculture	Yabbies Marron Oysters Southern bluefin tuna Barramundi Murray cod Abalone Gold and silver perch Scallops Yellowtail king fish	Ponds and farm dams Ponds and farm dams Rack and stick culturing Cage culture Recirculating tanks 54 licence holders Raceways and ocean rafts Pond culturing 78 licence holders 26 licence holders	202 licence holders 141 licence holders 290 licence holders 40 licence holders 34 licence holders 64 licence holders 121 licence holders

Tasmania

Abalone	Blacklip and greenlip abalone	Diving	125 diving
Rock lobster	Southern rock lobster	Pots	314 licence holders and 10 507 pots
Giant Crab	Giant crab	Pots	92 licence holders and 1035 units

Fishery	Species	Main fishing method	Number
Scallop	Commercial Doughboy Queen	Dredging	92 licence holders and 10 568 units
Scalefish	Various	Netting/hooks	416 licence holders
Aquaculture	Atlantic salmon, Pacific oysters Mussels Rainbow trout Scallops Abalone	Cage culture farming Rack and stick Longlines Sea cages Sea cages and land based tanks	42 licence holders 114 licence holders 33 licence holders 17 licence holders 15 licence holders 22 licence holders

Northern Territory

Coastal	Finfish and bait	Line, net and trap	75 licence holders
Offshore	Mackerel, shark and reef	Trolling, hand and longline net, trap and trawling	111 licence holders
Barramundi	Barramundi and threadfin	Gillnet	25 licence holders
Mud crab	Mud crab	Crab pots	49 licence hoders
Other	Molluscs, oyster, trepang, squid and aquarium	Hand harvest, jigging and a variety of other methods	29 licence holders
Aquaculture	Pearls Prawns Barramundi		25 licence holders
